

Love in the Time of Corona

Dating is hard, and dating during a pandemic can be especially challenging. In this support group, we will discuss and explore issues that affect dating relationships and one's ability to form meaningful connections. These topics may include attachment styles, unconscious attraction, boundary setting, family roles, and self-awareness. This online support group, led by Genevieve Wolff, LPC, is open to adults aged 21-35. A short intake interview is required to determine if the group is suitable for each participant.

Oct 1, 2020 – Nov 5, 2020

1-hour virtual support group meets
for 6 weeks
